From those who demand
Nothing but the Best!

"We have enjoyed working with Con-Tech when we are in need of new Mixers. They always have a great inventory of chassis in the yard with which is helpful when we need equipment quickly. The sales and service staff has been excellent and we appreciate having a single point of contact who takes care of our new Mixers as well as trades. Our Con-Tech Mixers outperform the competition and have many added features making them easy to service. We look forward to purchasing more trucks from Con-Tech in the future."

Paul
PARISH CONCRETE

"We at Bartoo Ready Mix LLC have a close relationship with, and respect for CONTECH Manufacturing, this is why!

Their relentless effort to give us a mixer truck that is user friendly, and performs above our expectations, is amazing. The availability of equipment when needed has been exceptional. The price of the mixer truck is affordable and fair.

Finally, the personal relationship with our salesman. This has put trust in play, which we can make business decisions from, and feel good about!"

Cary Barlow

UPGRADE TO HIGH

New Fin Spiral

is designed with an extra quarter turn to allow for a very smooth, even, and controlled discharge.

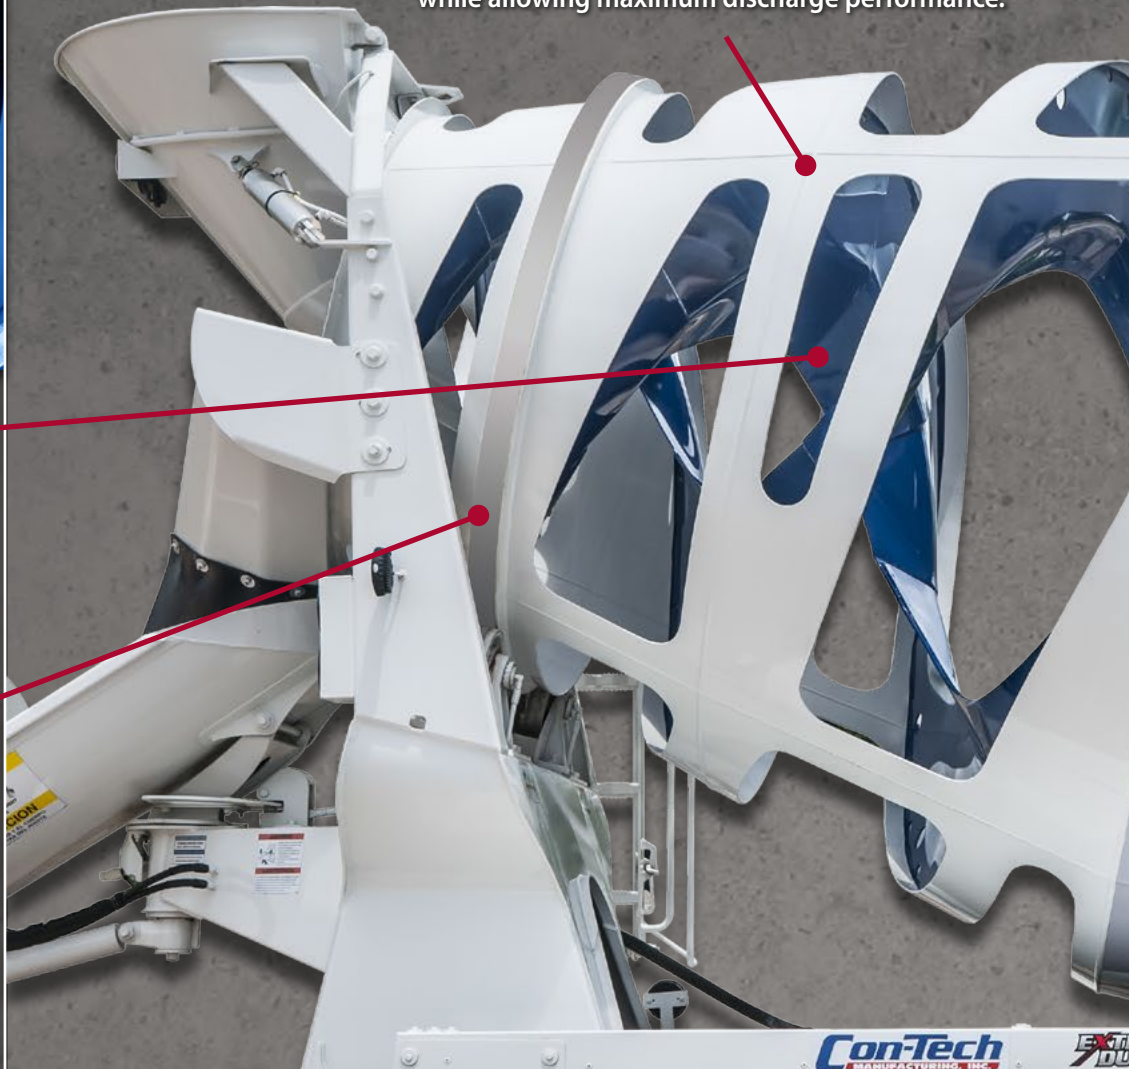

Solid Roller Track

is lighter and stronger than hollow designs, providing 350% more contact surface area and eliminates flexing and cracking.

Straight Cone Taper

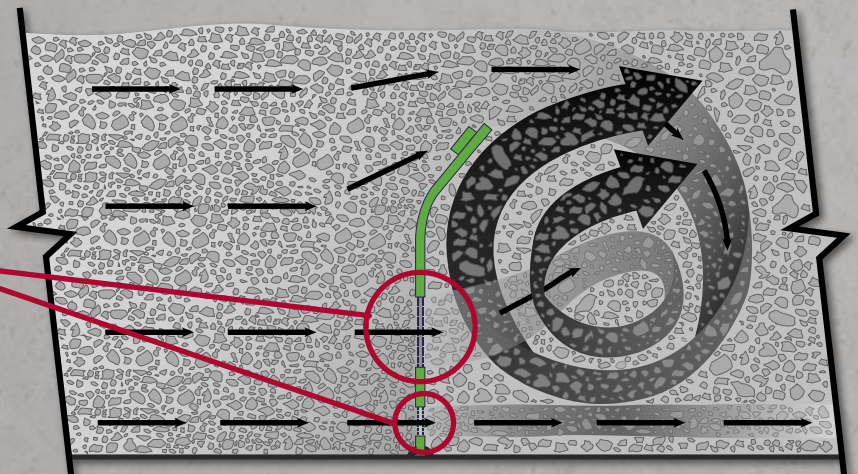

allows for a smooth discharge with virtually no surging, while allowing maximum discharge performance.

It's What's On The

Con-Tech's patent pending EcoFin technology allows concrete to flow through the mixing fins then be folded into the mix coming over the top of the fin. This provides a much more homogenized mix in a much more efficient manner than conventional designs.

Mixing holes allow concrete to pass through the fin along the drum skin providing a barrier from the mixing chamber. Reducing the wear on your mixing fins and drum skin.

phone 507-374-2239

fax 507-374-1094

H PERFORMANCE!

High Capacity

head and belly sections allow for 25% more material in the mixing bowl.

FABRICATED A.R. STEEL HEAD

More Wear Resistant

Up to 300% more wear resistant than typical Gr. 50 spun heads.

More Usable Steel

1/4" and 5/16" heads are true nominal thickness unlike spun heads that get thin on the radius.

Lighter

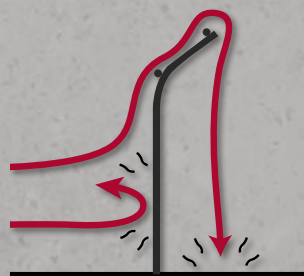

1/4" heads are 172 lbs. lighter than 1/4" spun heads.

Ball Buster

paddle system is strategically located for breaking apart floating dry balls.

Inside That Counts!

OTHER BRANDS

Con-Tech's patent pending A.R. steel 'lip doubler' provides ultimate wear protection.

HIGH PERFORMANCE
The Next Generation in High Performance Mixer Technology
The New Standard.
