# UPGRADE TO HIGH PERFORMANCE!

**Fabricated A.R. Steel Head**

**More Wear Resistant** •  
Up to 300% more wear resistant than typical Gr. 50 spun heads.

**More Usable Steel** •  
1/4" and 5/16" heads are true nominal thickness unlike spun heads that get thin on the radius.

**Lighter** •  
1/4" heads are 172lbs lighter than 1/4" spun heads.

**New fin spiral** is designed with an extra quarter turn to allow for a very smooth, even, and controlled discharge.

**Solid roller track** is lighter and stronger than hollow designs, Providing 350% more contact surface area and eliminates flexing and cracking.

**Straight Cone Taper** allows for a smooth discharge with virtually no surging, while allowing maximum discharge performance.

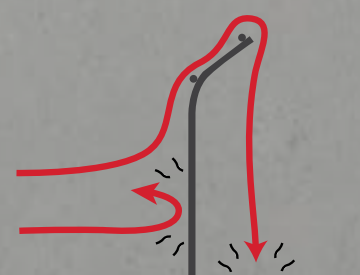

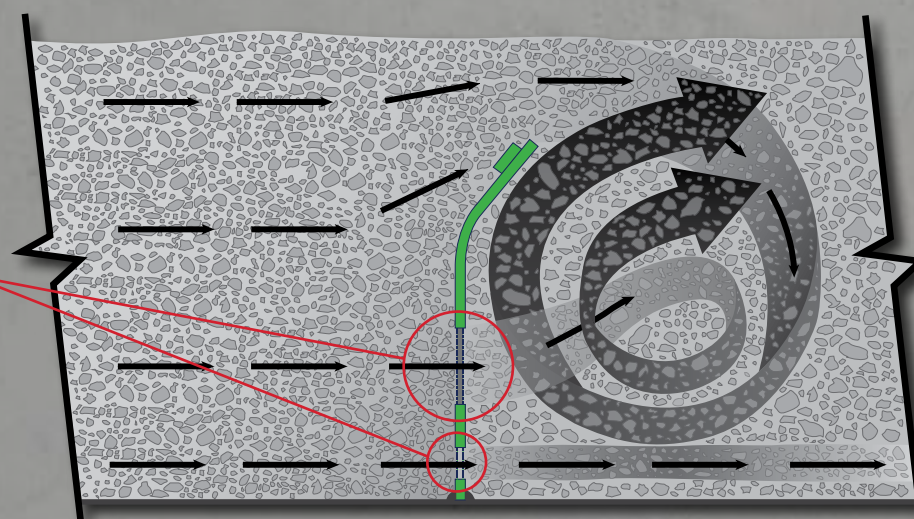

**High Capacity** head and belly sections allow for 25% more material in the mixing bowl.

**Ball Buster** paddle system is strategically located for breaking apart floating dry balls.

## It's Whats On The Inside that Counts!

Con-Techs patent pending EcoFin technology allows concrete to flow through the mixing fins then folded into the mix coming over the top of the fin. This provides a much more homogenized mix in a much more efficient manor than conventional designs. Mixing holes allow concrete to pass through the fin along the drum skin providing a barrier from the mixing chamber. Reducing the wear on your mixing fins and drum skin.

OTHER BRANDS

Con-Techs patent pending AR steel 'lip doubler' provides ultimate wear protection.
