UPGRADE TO HIGH PERFORMANCE!

It's Whats On The Inside that Counts!

Con-Tech's patent pending EcoFin technology allows concrete to flow through the mixing fins then folded into the mix coming over the top of the fin. This provides a much more homogenized mix in a much more efficient manner than conventional designs. Mixing holes allow concrete to pass through the fin along the drum skin providing a barrier from the mixing chamber. Reducing the wear on your mixing fins and drum skin.

The Next Generation In High Performance Mixer Technology

Controls – Con-Tech offers multiple options for your mixers Pump controls, and Rear operation controls that allow you to customize your trucks for your personal configuration. We offer both cable controls and RE (12 volt electric) pump controls. Rear controls can be cable pendant, and a rear control box, and or wireless (With or without switches).

Wiring Harness - Con-Tech wiring harnesses are built with simplicity and durability in mind. All wiring harnesses have each wire labeled for ease of trouble shooting, and built with Deutsch / Delphi connectors for unsurpassed reliability.

Hydraulics – Con-Tech trucks come standard with heavy duty EATON pumps and Motors. Included is a 5 Year Limited Warranty. Our hydraulic systems also come standard with Chevron Rando HD oil with advanced additive and base oil technology.

Gearbox – Con-Tech offers the ZF P-7300, the well-proven P-Series, which has been continuously upgraded in design and specifications, or the new ZF CML 10. Which offers weight saving, low noise, increased lifetime, easier maintenance / assembly and eco friendliness are all features of the new range.

HP Rollers – Con-Techs rollers were designed along with the High Performance pedestal. The combination of the taller roller and the lower deck allows for more room and easier access into the roller bracket for easier cleaning and maintenance.

HP Drum - Con-Techs High Performance Drum is designed from head to tail cone to meet and exceed the demands of producers everywhere. From EXTREME paving, down to filling wheel barrows, the all-new Con-Tech HP drum is the ULTIMATE SOLUTION! Once again, you asked, and Con-Tech Listened.

Rear Pedestal – Con-Techs High Performance rear pedestal was designed with 6 main pieces fully welded inside and out for ultimate corrosion resistance and strength. A lower deck plate, along with front and rear wash bands that direct materials out and away, allow for an easier and more thorough cleaning. Ultimately providing longer life by reducing build up and corrosion.

Main Chute – Our newly designed High Performance main chutes are wider providing a higher capacity. Designed to reduce clearance issues and to minimize material overflow while the chutes are in a horizontal position. All Con-Tech chutes are capped and 100% welded for strength and element resistance.

Pivot Bushings – We utilize the same polyurethane Atro bushing for the trailer pivot and the booster cylinder. Optimum performance, with minimum maintenance. Our pivots come with a 5 Year Warranty.

HP Ladder – Our newly designed High Performance ladders and platforms feature a non-slip, level, open tread design with extra wide upper and lower grab bars for a safe and easy transition.
