

INTERNATIONAL MYELOMA SOCIETY

EDUCATIONAL WORKSHOP

OCTOBER 27-28, 2017 | GAYLORD NATIONAL HARBOR

Join us for an educational workshop on the diagnosis, treatment and monitoring of plasma cell malignancies, including current practices and opportunities for improvement.

The workshop will include lectures plus roundtable discussions around the most hot and controversial topics, featuring point-counterpoint conversations between invited speakers and local hematologists based on both challenging questions and clinical cases.

Numerous networking opportunities will also be available in order to establish potential collaborations among speakers and participants.

FEATURED SPEAKERS:

FRIDAY

Multiple Myeloma: The past, present and future

Robert A. Kyle, MD
Mayo Clinic
Rochester, MN

SATURDAY

Future targets and therapy in myeloma?

Kenneth C. Anderson, MD
Dana-Farber Cancer Institute
Boston, MA
