

FOR IMMEDIATE RELEASE

## **Domaille Engineering Announces AS9100D Certification Achievement**

ROCHESTER, MN, September 09, 2017– Domaille Engineering, LLC, known for providing World Class manufacturing solutions has accomplished well in advance of the International Aerospace Quality Group’s (IAQG) September 2018 deadline, the completion of AS9100D certification. The audit was performed by Perry Johnson Registrar.

AS9100D is an international standard for manufacturing products, including parts, components and assemblies for aerospace and defense industries.

Requirements for AS9100D are specific to the context of the organization, leadership, planning, support and operations with a focus on continuous improvement in quality, cost, delivery and performance for the aerospace industry.

AS9100D includes new requirements above and beyond those specified in AS9100C, such as rigorous risk-based thinking, driving it throughout the organization and building it into the entire quality management system.

“We are extremely proud of our team’s accomplishment, and look forward to expanding our long term relationships with clients while remaining on the forefront of the AS9100D certification and exceeding their quality requirements” said Vice President of Business Development Dean Krueger.

Domaille’s commitment to excellence is driven by talented engineering and project management teams. Our team is well versed in diverse disciplines including: manufacturing engineering, quality, mechanical engineering, producibility studies and thermal engineering. Domaille Engineering has successfully helped clients develop unique manufacturing solutions for over 25 years.
