

Domaille Engineering, an ultra-precision design and manufacturing company, is accepting resumes/applications for a Precision Assembler position.

Core Responsibilities:

- ❑ Assembles various parts to specifications and drawings utilizing proper tools and equipment to meet time and quality standards, some assemblies requiring the use of a microscope.
- ❑ Read and interpret drawings, blueprints, specifications, work orders, reports.
- ❑ Assemble electrical or electronic systems and install components, units, subassemblies, wiring, assembly cases using rivets, bolts and other various equipment.
- ❑ May need to remove small quantities of metal with hand files and scrapers to produce required fit between parts.
- ❑ Ensures parts used in assembly are correct, functional and of high quality.
- ❑ Inspects assembled parts for zero defects.
- ❑ Verify dimensions and clearances of parts to ensure conformance to specifications, using instruments, such as micrometers, calipers and height gauges.
- ❑ Test product to ensure compliance to specifications as well as functionality.
- ❑ Informs supervisor of parts not in tolerance.
- ❑ Looks for assembly or process improvements that result in increased quality and/or productivity.
- ❑ Assists in development and maintenance of assembly methods, including assembly drawings, bill of materials and written procedures.
- ❑ Seeks out additional duties when needed.
- ❑ Demonstrates cooperation and teamwork with co-workers, management, and outside contacts.
- ❑ Makes proper use of equipment and tools for assembly and inspection.

Education/Experience: High school graduate with five years of related experience and/or training; or equivalent combination of education and experience. Must be able to analyze and resolve assembly issues – a good problem solver.

Skills: High Mechanical/Electrical aptitude, Microscopy

Training: OSHA Right to Know and Quality management system orientation.
