SECTION B. REBATE APPLICATION CHECKLIST

Use this checklist to complete the steps to receive your rebates:

- 1. Read the following terms and conditions to determine if you are eligible for a rebate:
 - Only one service address per application.
 - Rebates are intended for customers, not contractors or builders.
 - The Utility reserves the right to apply rebates to past due accounts. Rebates \$75 and under will be applied to your account. Rebates will not exceed the purchase price.
 - Energy-efficient equipment must be connected to an electric service supplied by Austin Utilities, Owatonna Public Utilities, or Rochester Public Utilities and is subject to inspection.
 - Purchase and install **NEW** products. Reconditioned, refurbished, or second-hand equipment is not eligible for a rebate.
 - Equipment installations must meet our Minimum Efficiency Requirements to qualify for a rebate. Air-Conditioning, Heating, and Refrigeration Institute (AHRI) and ENERGY STAR® standards are used. Please refer to each rebate section of this form for requirements and reference sources. The Utility reserves the right to reject any rebate application submitted as a result of work performed by a contractor who has failed to adhere to the terms and conditions established for the rebate program. Contractors must be licensed if applicable.
 - Due to limited funding, this rebate offer can be withdrawn at any time without notice. Applications will be processed on a first-come, first-serve basis. All applications from this year's purchases (2020) must be received by March 31, 2021.
 - Rebates can only be offered on equipment that is installed while funding is in effect. In the event our program is discontinued due to depleted funds, we will not provide a rebate for items installed between the discontinued date and the end of that year.
- 2. Complete the application, making sure to fill out all required sections in detail. Allow 6-8 weeks for processing. Missing or incorrect information will increase the processing time.
- 3. Include a final, detailed copy of the original sales receipt, invoice, or picking slip showing the customer name, date of sale, manufacturer name, model number, size, and date of installation. **All HVAC equipment must have model numbers listed on the invoice.**
- 4. Sign the application.
- 5. Mail completed forms and required documentation to your utility provider:

2020 PRIMARY ELECTRIC HEAT AND ELECTRIC WATER HEATING REBATES

HEAT PUMP WATER HEATERS – ENERGY STAR®

Must replace an existing electric storage tank water heater or be installed in a new home. Heat pump water heaters that replace gas, propane, or other non-electric water heaters are not eligible. Electric instantaneous (tankless) water heaters do not qualify.

REBATES FOR HOMES WITH ELECTRIC HEAT (not to exceed 50% of cost): \$270 for 20-55 gallon heat pump
\$60 for >55 gallon heat pump

REBATES FOR HOMES WITH NATURAL GAS HEAT (not to exceed 50% of cost): \$400 for 20-55 gallon heat pump
\$90 for >55 gallon heat pump

Considerations:

- Work with a licensed plumber to determine if a heat pump water heater is right for your home.
- For a heat pump water heater to run efficiently, the space should generally stay above 40 degrees Fahrenheit year round.
- Since heat pumps remove heat from the ambient air, there must be a considerable amount of air available in the space. Most manufacturers recommend a minimum of 750 cubic feet, which means closets (even those with louvered doors) are usually not appropriate locations for heat pump water heaters.
- Recommended clearances should be followed to ensure adequate air circulation.
- Visit www.energystar.gov/products/hot-water-heater-replacement-guide to learn more.

SMART THERMOSTATS – ENERGY STAR®

Only available to systems that control electric heating or control electric heating and air conditioning systems.

GROUND SOURCE HEAT PUMPS

MINIMUM EFFICIENCY REQUIREMENTS: **Water-to-Air Heat Pumps: EER greater than or equal to 17.1 and COP greater than or equal to 3.6 (must also be AHRI Certified and a 2-stage unit)**
Water-to-Water Heat Pumps: EER greater than or equal to 16.1 and COP greater than or equal to 3.1 (must also be AHRI Certified)

REBATE: \$200 per Ton + \$20 per Ton per EER over Minimum Efficiency Requirement + \$250 per desuperheater

NOTE: MULTI-STAGE UNITS MAY MEET MINIMUM EFFICIENCY REQUIREMENTS BASED ON THE FOLLOWING:

- AVERAGE EER = (highest rated capacity EER + lowest rated capacity EER) / 2
- AVERAGE COP = (highest rated capacity COP + lowest rated capacity COP) / 2

FOR MULTI-STAGE UNITS, REBATE CALCULATION WILL BE BASED ON FULL LOAD TONS AND AVERAGE EER.

AHRI=Air-Conditioning, Heating, and Refrigeration Institute - www.ahridirectory.org
 EER=Energy Efficiency Rating
 COP=Coefficient of Performance

CHOOSE ONE: **Water-to-Air Heat Pump:** The efficiency ratings are determined using the Air-Conditioning, Heating, and Refrigeration Institute's (AHRI) directory, which may be found at www.ahridirectory.org. EER rating is at ISO 13256-1 cooling conditions of 77°F entering water temp. and 80.6°F dry bulb/66.2°F wet bulb entering air temperature (ground loop heat pump).

Water-to-Water Heat Pump: The efficiency ratings are determined using the Air-Conditioning, Heating, and Refrigeration Institute's (AHRI) directory, which may be found at www.ahridirectory.org. EER rating is at ISO 13256-2 cooling conditions of 77°F entering water temp. and 53.6°F leaving water temperature (ground loop heat pump).

**Thank you for purchasing new, efficient equipment
and for applying for a CONSERVE & SAVE® rebate!**

When purchasing new items, continue to look for the Energy Star®, Energy Star® Most Efficient, and WaterSense® labels.

By doing so, you will save energy, water, and money while ensuring product performance.

Austin, Owatonna, and Rochester Public Utilities may also offer a CONSERVE & SAVE® rebate on your purchase!

For a complete list of available rebates, amounts, and to download rebate applications with minimum efficiency requirements and complete terms and conditions, visit your utility's website:
