SECTION B. REBATE APPLICATION CHECKLIST

Use this checklist to complete the steps to receive your rebates:

1. Read the following terms and conditions to determine if you are eligible for a rebate:

- Only one service address per application.
- Rebates are intended for customers, not contractors or builders.
- The Utility reserves the right to apply rebates to past due accounts. Rebates \$75 and under will be applied to your account. Rebates will not exceed the purchase price.
- Energy-efficient equipment must be connected to an electric service supplied by Austin Utilities, Owatonna Public Utilities, or Rochester Public Utilities and is subject to inspection.
- Purchase and install **NEW** products. Reconditioned, refurbished, or second-hand equipment is not eligible for a rebate. Products replaced under warranty or provided through a repair/replacement service agreement are not eligible for a rebate.
- Equipment installations must meet our Minimum Efficiency Requirements to qualify for a rebate. Air-Conditioning, Heating, and Refrigeration Institute (AHRI) and ENERGY STAR[®] standards are used. Please refer to the appliance, lighting, or HVAC rebates sections of this form for requirements and reference sources. The Utility reserves the right to reject any rebate application submitted as a result of work performed by a contractor who has failed to adhere to the terms and conditions established for the rebate program. Contractors must be licensed if applicable.
- Due to limited funding, this rebate offer can be withdrawn at any time without notice. Applications will be processed on a first-come, first-served basis. All applications from this year's purchases (2023) must be received by March 31, 2024.
- Rebates can only be offered on equipment that is installed while funding is in effect. In the event our program is discontinued due to depleted funds, we will not provide a rebate for items installed between the discontinued date and the end of that year.
- 2. Complete the application, making sure to fill out all required sections in detail. Allow 6-8 weeks for processing. Missing or incorrect information will increase the processing time.
- **3.** Include a final, detailed copy of the original sales receipt, invoice, or picking slip showing the customer name, date of sale, manufacturer name, model number, size, and date of installation. **All HVAC equipment must have serial and model numbers listed on the invoice.**
- **4.** Sign the application.
- 5. Information contained in this rebate application may be shared with the Minnesota Department of Commerce and our co-op partners.
- 6. Submit completed forms and required documentation to your utility provider:

Austin Utilities

Apply by Mail:Attn: Rebate Processing
1908 14th St NE

	working unit		OFFICE USE ONLY			
Primary method to HEAT your home:	Electric					
	Natural Gas/Other		Rebate Total: \$			

Heat Pump Water Heaters (HPWHs)

HPWHs transfer heat from the surrounding air to heat water. Because HPWHs move heat, rather than create heat, they can be extremely energy-efficient when compared to electric resistance water heating. The evaporator vaporizes a refrigerant. A fan moves the surrounding air and the refrigerant absorbs the air's heat. The heated refrigerant then moves to the compressor, where pressure and temperature increase. The heated and compressed refrigerant runs through the condenser inside the storage tank where the heat transfers to the water supply. Electric resistance elements operate as a back-up heat source if hot water supplies are depleted and faster recovery is needed.

Considerations:

- Work with a licensed plumber to determine if a heat pump water heater is right for your home.
- For a heat pump water heater to run efficiently, the space should generally stay above 40 degrees Fahrenheit year round.
- Since heat pumps remove heat from the ambient air, there must be a considerable amount of air available in the space. Most manufacturers recommend a minimum of 750 cubic feet, which means closets (even those with louvered doors) are usually not appropriate locations for heat pump water heaters.
- · Recommended clearances should be followed to ensure adequate air circulation.
- Visit <u>www.energystar.gov/products/hot-water-heater-replacement-guide</u> to learn more.

Thank you for purchasing new, efficient appliances and equipment and for applying for a CONSERVE & SAVE® rebate!

When purchasing new items, continue to look for the Energy Star[®], Energy Star[®] Most Efficient, and WaterSense[®] labels. By doing so, you will save energy, water, and money while ensuring product performance. Austin, Owatonna, and Rochester Public Utilities may also offer a CONSERVE & SAVE[®] rebate on your purchase! For a complete list of available rebates, amounts, and to download rebate applications with minimum efficiency requirements and complete terms and conditions, visit your utility's website:
