SECTION E. TERMS AND CONDITIONS

1. ELIGIBILITY

Rebates are available to non-residential customers of Austin Utilities, Owatonna Public Utilities, and Rochester Public Utilities (here-in referred to as The Utility). All products must be in use in facilities in the Utility service territory. The applicant shall be an end-user (i.e., not a variable speed drive wholesaler, distributor, or installer) of either commercial or industrial variable speed drives.

2. APPLICATION

Program is offered January 1 through December 31 of the respective calendar year. **Due to limited funding, this rebate offer can be changed or withdrawn at any time without notice and is available on a first-come, first-serve basis.** All projects must be pre-approved by the Utility to qualify for a rebate. The entire rebate application must be read and filled out completely or the application will be returned.

3. INSPECTION AND VERIFICATION

The Utility reserves the right to inspect the customer's facility through on-site visits before and after new equipment installation or inventory to verify rebate eligibility. The Utility reminds you to follow all local permitting and building code ordinances.

4. INSTALLATION AND REBATE AMOUNTS

Qualifying new variable speed drives installed and operational within six (6) months of the date of purchase are eligible for rebate under the NEW or RETROFIT rebate schedule. Additional time may be granted subject to the Utility's pre-approval. Qualifying variable speed drives being used for replacement of on-site inventory are eligible for rebate under the INVENTORY rebate schedule. In no case will the rebate paid by the Utility exceed the purchase price of the equipment. The maximum rebate amount may be limited. Variable speed drives that qualify for Utility rebates under other Utility programs are not eligible for a rebate payment under this program.

5. INVOICE AND PAYMENT

Following inspection and verification (see #3) and completed installation, the customer must notify the utility and submit original invoices specifying the quantity and price of all materials purchased, the date ordered, installation costs, and applicable taxes. After satisfactory review of the invoices and on-site verification, a rebate check will be issued to the Customer. Vendors or contractors are not eligible to receive the rebate. Please allow 6 - 10 weeks from the date of on-site inspection for delivery of payment. The utility reserves the right to apply rebates to past due accounts.

6. EQUIPMENT ELIGIBILITY REQUIREMENTS

To be eligible for a rebate, the variable speed drive installation must meet the following conditions:

- a. Rebates are limited to HVAC fan and pump installations. Variable speed drives larger than 200 horsepower and installations on other motor-driven machinery, constant torque loads, and hydraulic pumping may qualify for an incentive through our Custom High-Efficiency Rebate Program. VSDs used only as a soft-start are not eligible for a rebate.
- b. The fan or pump does not require a drive as a standard mode of operation.
- c. The drive must contribute energy savings in normal operation.
- d. The drive must vary motor speed automatically.
- e. The drive must have a true power factor of 0.90 or greater.
- f. VSD's can cause waveform disturbances on the power lines. Therefore, a line reactor between the power source and the drive must be included. The reactor rating should be as recommended by the VSD supplier but not less than 3 percent impedance of the VSD rating.

The following new construction VSD installations are not eligible for rebates:

- VAV fan units greater than or equal to 7.5 horsepower without variable pitch fan blades.
- Heat rejection fans greater than or equal to 7.5 horsepower.
- Non-multi-stage hydronic pumping systems with a design output greater than 300,000 Btuh.

7. TAX INFORMATION

The Utility will not be responsible for any tax liability imposed as a result of the rebate payment(s). Customers are advised to consult their tax advisors for details.

8. DISCLAIMER

The Utility does not guarantee that the implementation of energy-efficient measures or use of the equipment purchased or installed pursuant to this program will result in energy or cost savings. The Utility makes no warranties, expressed or implied, with respect to any equipment purchased or installed including, but not limited to, any warrant of merchantability or fitness for purpose. In no event shall The Utility be liable for any incidental or consequential damages. Customers are solely responsible for the proper disposal of existing equipment. Consult the Minnesota Pollution Control Agency (MPCA) office for details at 800.657.3864.

9. ENDORSEMENT

The Utility does not endorse any particular vendor, manufacturer, product, or system in promoting this rebate program. Listing a vendor or product does not constitute an endorsement, nor does it imply that unlisted vendors or products are deficient or defective in any way.

10. PRIVACY

Information contained in this rebate application may be shared with the Minnesota Department of Commerce and our co-op partners and also may be used in our advertising efforts with your permission as granted in Section B of this rebate application.
