Where & How To Plant a Tree

Follow these basic rules and you will save energy and money on your utility bills:

Plant deciduous (leaf-shedding) trees on the south and west sides of your home and:

- Provide energy saving shade and save on your utility bill.
- Reduce the demand on your air-conditioning system in summer months.
- Allow sunshine to warm your home during winter months.

Plant evergreen trees on the north and west sides of your home and:

- Create a windbreak that blocks cold winter winds.
- Save energy and money on your heating bill.
- Ease the load on your home heating system.

Before you plant, remember to:

- Call before you dig! Contact Gopher State One - Call 811.
- If you are planting in the boulevard or right of way, please contact the Rochester Parks & Recreation Forestry Division at 507-328-2515 or download the permit at:
www.rochestermn.gov/government/departments/parks-and-recreation/forestry/forestry-permits
- Avoid placing trees under power lines.
- Plant your trees the proper distance from your home.
- Contact your nursery or garden center professional for help.

Plant the right tree in the right place

Plant taller trees away from overhead utility lines

Tall trees, such as:
• Maple • Oak
• Spruce • Pine

Arbor Day Foundation™
arborday.org

Medium trees, such as:
• Washington hawthorn
• Goldenrain tree

Small trees, such as:
• Star magnolia
• Crabapple
