Where & How To *Plant a Tree*

Follow these basic rules and you will save energy and money on your utility bills:

Plant deciduous (leaf-shedding) trees on the south and west sides of your home and:
- Provide energy saving shade and save on your utility bill.
- Reduce the demand on your air-conditioning system in summer months.
- Allow sunshine to warm your home during winter months.

**Plant evergreen trees on the north and west sides of your home and:**
- Create a windbreak that blocks cold winter winds.
- Save energy and money on your heating bill.
- Ease the load on your home heating system.

Before you plant, remember to:
- Call before you dig! Contact Gopher State One – Call 811.
- If you are planting in the boulevard or right of way, please contact the Rochester Parks & Recreation Forestry Division at 507-328-2515 or download the permit at: www.rochestermn.gov/government/departments/parks-and-recreation/forestry/forestry-permits
- Avoid placing trees under power lines.
- Plant your trees the proper distance from your home.
- Contact your nursery or garden center professional for help.

Plant the right tree in the right place
Plant taller trees away from overhead utility lines

Tall trees
40 ft height or less
Tree Pruning Zone
25 ft height or less
20 ft
50 ft
Medium trees
Small trees
