

Right Light Guide

for General Use Bulbs

Today there are many lighting options available. The right bulb for you depends on how much light you need, what color light you want, and its costs and features. This guide, and the new Right Light App, will help you compare!

STEP 1 Decide How Much Light You Need

Focus on Brightness.

Different amounts of light are needed for different uses. Instead of thinking about light bulbs based solely on the amount of energy they use, focus on their brightness level.

Lumen is the measurement of brightness. Higher lumen bulbs produce brighter light.

Watt (W) is the measure of power consumption. Lower wattage bulbs can lower your electric bills.

If you like your bulbs' current brightness, choose CFLs or LEDs with similar lumens to reduce your energy use. You may also consider a bulb that is not as bright to save more.

Brightness	Incandescent	CFL	LED
450 lumens ☀	40W	9-13W	4-8W
800 lumens ☀	60W	13-16W	8-13W
1100 lumens ☀	75W	17-23W	11-15W
1600 lumens ☀	100W	23-28W	16-20W

← Least Efficient Most Efficient →

Note: Lumen output listed on packages may vary. For example, light bulbs listing anywhere from 800 to 860 lumens are similarly bright.

STEP 2 Decide What Color Light You Want

Choose Light Appearance.

You'll be pleased with your new bulb by choosing a light appearance that you like.

All of these colors are available for LEDs and CFLs and at most brightness levels.

Note: Choose warm or soft white (2700-3000 K) to match the color of incandescent bulbs.

Different Colors, Same Brightness

Soft White, Warm White
Living Room,
Bedroom

Bright White, Cool White
Kitchen, Bathroom,
Dining Room

Natural, Daylight
Office, Laundry,
Workshop, Garage

← Warm Color		Light Appearance		Cool Color →	
2700K	3000K	3500K	4100K	5000K	6500K

STEP 3

Think About Costs and Benefits

Compare Types of Light Bulbs.

You can think about product, replacement, and energy costs over 20 years for different bulb types. Why 20 years? Because LEDs can last that long. Many incandescent bulbs have been phased out, and CFLs are becoming less popular. The pros and cons below will help you pick a bulb that is right for you, and so will the Right Light App at the bottom.

Cost Over 20 Years	Bulb(s)	Energy	Pros (+) and Cons (-)
LED	 1 bulb in 20 years 	\$40 total cost	<ul style="list-style-type: none"> + Saves 85% of energy use over incandescent + Lasts 25 times longer than incandescent + Great for dimmed, recessed, or enclosed fixtures + Performs well in cold temperatures - Higher bulb cost
CFL	 3 bulbs in 20 years 	\$50 total cost	<ul style="list-style-type: none"> + Saves 75% of energy use over incandescent + Lasts 10 times longer than incandescent - Recessed & enclosed fixtures reduce bulb life - Performs poorly in cold temperatures - Contains mercury (recycling required)
Incandescent	  22 bulbs in 20 years Bulb & Replacement Cost Energy Cost	\$270 total cost	

Note: Cost comparison is based on a 20-year life-cycle and takes into account power consumption, hours of use per day, residential electric cost, bulb cost, and replacement cost. For detailed cost calculations and a full pro/con list, visit www.cleanenergyresourceteams.org/lighting.

STEP 4

Find Bulbs

There's an app for that!

The Right Light App helps you choose the right energy efficient LED bulb for you, from bulb and fixture types to color and brightness suggestions! Access the app from any device at rightlightapp.org.

Buying High-Quality Bulbs.

The **Lighting Facts** label on all bulb packaging clearly shows light appearance and brightness. The label also includes the ENERGY STAR® logo when a bulb meets the required certification levels for high efficiency, performance, and reliability.

Lighting Facts Per Bulb	
Brightness	800 lumens
Estimated Yearly Energy Cost	\$1.14
Based on 3 hrs/day, 11¢/kWh Cost depends on rates and use	
Life	22.8 years
Based on 3 hrs/day	
Light Appearance	Warm ————— Cool
	2700 K
Energy Used	9.5 watts

STEP 5

Rebates and Resources

Visit www.rpu.org to learn about CONSERVE & SAVE™ rebates on LED light fixtures and more ways to save or contact RPU Customer Care at 507-280-1500.

Visit the CERTs lighting website at www.cleanenergyresourceteams.org/lighting to learn more about lighting options and find bulb recycling locations.
