## How to Plant a Tree

Follow these basic tree-planting rules and you will save energy and money on your utility bills.

### Plant deciduous (leaf-shedding) trees on the south and west sides of your home and:

- Provide energy saving shade and save on your utility bill.
- Reduce the demand on your air-conditioning system in summer months.
- Allow sunshine to warm your home during winter months.

### Plant evergreen trees on the north and west sides of your home and:

- Create a windbreak to block cold winter winds.
- Save energy and money on your heating bill.
- Ease the load on your home heating system.

### Before you plant, remember to:

- Call before you dig!  
Gopher State One-Call  
(800) 252-1166
- Plant your trees the proper distance from your home.
- Avoid placing trees under power lines.
